One of the headaches of running multiple PCs in your home and small business is managing the slew of operating system updates that Microsoft regularly delivers. If you have bandwidth caps, or simply haven't the time to download and install all of those updates separately on each computer, why not download them once and distribute them locally via Windows Server 2012 Essentials?

Install Windows Server Update Services on Windows Server 2012 Essentials is a detailed guide to installing, configuring and running WSUS on Windows Server 2012 Essentials. Once up and running, your server will download and store all of those updates centrally and your PCs will connect locally for their updates.

Operating system updates, Microsoft Office Service Packs, Windows Drivers and more can be held on the server and pushed out locally to your PCs, with emailed reports issued to you and others with progress updates.

Our 48 page eBook explains how to get WSUS installed and configured with screenshots guiding you step by step through the process. Follow closely and you'll be saving time and bandwidth immediately!
