This stimulating new book, as the premier work introducing bilingual lexicography from a communicative perspective, is launched to represent original thinking and innovative theorization in the field of bilingual lexicography. It treats the bilingual dictionary as a system of intercultural communication and bilingual dictionary making as a dynamic process realized by sets of choices, characterizing the overall nature of the dictionary. It examines the dictionary and dictionary making by using a model of lexicography which stresses the three-way relationship of *compiler*, *dictionary context* and *user* and incorporates them into a unified coherent framework. Throughout the study, special focus is on English and Chinese bilingual lexicography. It will serve not only as a valuable guide to those interested in dictionary compilation and theoretical inquiries but also as a textbook for undergraduate and postgraduate courses in bilingual lexicography.
