Websphere Application Server V8.5 Administration and Configuration Guide for Liberty Profile

Websphere Application Server V8.5 Administration and Configuration Guide for Liberty Profile
WebSphere® Application Server V8.5 includes a Liberty profile, which is a highly composable, dynamic application server profile. It is designed for two specific use cases: Developers with a smaller production runtime, and production environments.

For a developer, it focuses on the tasks a developer does most frequently and makes it possible for the developer to complete those tasks as quickly and as simply as possible. For production environments, it provides a dynamic, small footprint runtime to be able to maximize system resources.

This IBM® Redbooks® publication targets administrators of Liberty profile environments. It provides the information needed to create, configure, and manage Liberty profile servers. It includes information on managing multiple servers in an installation, including the use of the new administrative capabilities introduced in WebSphere Application Server V8.5.5.

The following publications are companion publications for this book:

WebSphere Application Server: New Features in V8.5.5, REDP-4870
WebSphere Application Server V8.5.5 Technical Overview, REDP-4855
IBM WebSphere Application Server V8.5 Concepts, Planning, and Design Guide, SG24-8022
WebSphere Application Server Liberty Profile Guide for Developers, SG24-8076
