Modelo Sistémico para la Conservación de la Arquitectura: Conservación Arquitectónica Histórica (Spanish Edition) Agustín López Romero

La arquitectura es movimiento, movimiento de la razón poética a la razón gráfica (Ruiz de la Cortina); lo es en muros, colores, luz; esquematizado en la forma que, orientada al lago o jardín, es la arquitectura que envuelve con su sencillez y riqueza. La tesis presenta una forma para concebir la Conservación Arquitectónica Histórica; no se queda en el análisis sino va ordenando las diferentes categorías del conocimiento hasta llegar a la propuesta de solución; por lo tanto nos transfiere paso a paso, de lo sencillo a lo complejo o viceversa, del material a la técnica primigenia, de la herramienta al equipo tecnológico . En conclusión, pretende ser un modelo creativo y dinámico de interacción epistemológica.
