Advanced Sensors for Safety and Security (NATO Science for Peace and Security Series B: Physics and Biophysics)

Advanced Sensors for Safety and Security (NATO Science for Peace and Security Series B: Physics and Biophysics)

This book results from a NATO Advanced Research Workshop titled “Technological Innovations in CBRNE Sensing and Detection for Safety, Security, and Sustainability” held in Yerevan, Armenia in 2012. The objective was to discuss and exchange views as to how fusion of advanced technologies can lead to improved sensors/detectors in support of defense, security, and situational awareness. The chapters range from policy and implementation, advanced sensor platforms using stand-off (THz and optical) and point-contact methods for detection of chemical, nuclear, biological, nuclear and explosive agents and contaminants in water, to synthesis methods for several materials used for sensors. In view of asymmetric, kinetic, and distributed nature of threat vectors, an emphasis is placed to examine new generation of sensors/detectors that utilize an ecosystems of innovation and advanced sciences convergence in support of effective counter-measures against CBRNE threats. The book will be of considerable interest and value to those already pursuing or considering careers in the field of nanostructured materials, and sensing/detection of CBRNE agents and water-borne contaminants. For policy implementation and compliance standpoint, the book serves as a resource of several informative contributions. In general, it serves as a valuable source of information for those interested in how nanomaterials and nanotechnologies are advancing the field of sensing and detection using nexus of advanced technologies for scientists, technologists, policy makers, and soldiers and commanders.

From reader reviews:

Christy Dennie:

Reading a reserve can be one of a lot of activity that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new details. When you read a guide you will get new information simply because book is one of numerous ways to share the information as well as their idea. Second, looking at a book will make you more imaginative. When you examining a book especially tale fantasy book the author will bring one to imagine the story how the figures do it anything. Third, you could share your knowledge to other folks. When you read this Advanced Sensors for Safety and Security (NATO Science for Peace and Security Series B: Physics and Biophysics), you could tells your family, friends and soon about yours e-book. Your knowledge can inspire different ones, make them reading a e-book.

Martha Doughty:

The e-book untitled Advanced Sensors for Safety and Security (NATO Science for Peace and Security Series B: Physics and Biophysics) is the reserve that recommended to you to read. You can see the quality of the book content that will be shown to an individual. The language that writer use to explained their ideas are easily to understand. The article writer was did a lot of research when write the book, therefore the information that they share to your account is absolutely accurate. You also will get the e-book of Advanced Sensors for Safety and Security (NATO Science for Peace and Security Series B: Physics and Biophysics) from the publisher to make you far more enjoy free time.

David Dabbs:

Your reading sixth sense will not betray anyone, why because this Advanced Sensors for Safety and Security (NATO Science for Peace and Security Series B: Physics and Biophysics) e-book written by well-known writer who really knows well how to make book that can be understand by anyone who all read the book. Written inside good manner for you, leaking every ideas and publishing skill only for eliminate your personal hunger then you still question Advanced Sensors for Safety and Security (NATO Science for Peace and Security Series B: Physics and Biophysics) as good book not only by the cover but also with the content. This is one guide that can break don't judge book by its include, so do you still needing yet another sixth sense to pick that!? Oh come on your reading sixth sense already told you so why you have to listening to yet another sixth sense.

Sally Kim:

As we know that book is essential thing to add our understanding for everything. By a book we can know everything we want. A book is a range of written, printed, illustrated or blank sheet. Every year had been exactly added. This publication Advanced Sensors for Safety and Security (NATO Science for Peace and Security Series B: Physics and Biophysics) was filled with regards to science. Spend your extra time to add

your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading some sort of book. If you know how big good thing about a book, you can really feel enjoy to read a book. In the modern era like now, many ways to get book that you just wanted.
