User Account Control was something new that appeared in Microsoft Vista that is meant to let you know when something you did not approve of was taking place on your computer. An example would be installing software or changing settings by an infection that may be on your computer.

The problem with UAC in Vista was that it was annoying, popping up when you installed software or tried to open software that would make changes to your system.

The only options you have in Vista is to turn UAC on or off.

When Microsoft Windows 7 came out UAC was still a part of it. Although, Microsoft heard the rants from Vista users and provided much better control over how UAC works.

This guide will show you how to change the settings for UAC on Windows 7.
