Managing and Designing Landscapes for Conservation: Moving from Perspectives to Principles (Conservation Science and Practice)

Managing and Designing Landscapes for Conservation: Moving from Perspectives to Principles (Conservation Science and Practice)

The distinctive relationships between landscape change, habitat fragmentation, and biodiversity conservation are highlighted in this original and useful guide to the theory and practice of ecological landscape design. Using original, ecologically based landscape design principles, the text underscores current thinking in landscape management and conservation. It offers a blend of theoretical and practical information that is illustrated with case studies drawn from across the globe.

Key insights by some of the world's leading experts in landscape ecology and conservation biology make *Managing and Designing Landscapes for Conservation* an essential volume for anyone involved in landscape management, natural resource planning, or biodiversity conservation.
