West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11)

Robin Walker

When West Africa is mentioned in a historical context, it is usually presented as the traditional hunting ground for slaves. Very few writers have shown any interest in the contributions of West Africans to science and technology, and thus there has been very little research that challenges the perspective that all that West Africans have ever been historically is to be under the whip of other peoples.

Fortunately, the tide is beginning to change, a National Geographic article entitled Reclaiming the Ancient Manuscripts of Timbuktu mentioned that some scholars believe that 700,000 manuscripts, some dating to the twelfth century, have survived in the West African city of Timbuktu. They also say the manuscripts 'covered an array of subjects: astronomy, medicine, mathematics, chemistry,' etcetera.

The article mentioned other data that is little known today but well worth repeating: 'Beginning in the 12th century, Timbuktu was becoming one of the great centers of learning in the Islamic world. Scholars and students traveled from as far away as Cairo, Baghdad, and elsewhere in Persia to study from the noted manuscripts found in Timbuktu. Respected scholars who taught in Timbuktu were referred to as ambassadors of peace throughout North Africa.'

Like the National Geographic article, this lecture essay presents a different side to West African historical achievements. Challenging all stereotypes, it is a general introduction to the exciting role played by early West Africans in the evolution of Mathematics, Astronomy & Physics, Metallurgy, Medicine & Surgery, Boat building & Navigation, Architecture, and Crafts & Industry.

There are some interesting findings that that appear in this text:

- The Bamoun Kingdom, now in today's Cameroon, has 7,000 surviving manuscripts in their own script
- Timbuktu astronomers used the cosine, tangent, cotangent, secant and cosecant functions of trigonometry
- The Dogon of Mali had an early and wholly indigenous notion of 'big bang' derived from a singularity
- A number of iron and copper tools were excavated in Senegal dating from 2800 BC
- The total amount of gold mined in the desert regions of West Africa to the year 1500 was \$35 billion at 1998 gold prices
- A surviving sixteenth century Timbuktu manuscript has a formula for making toothpaste and adds that regular brushing of your teeth removes bad breath
- The majority of enslaved Africans were inoculated against smallpox BEFORE they were deported from Africa
- A 1342 text published in Cairo mentions two royal Malian voyages sailing across the Atlantic involving hundreds of vessels
- The Royal Palace of the Ashanti Empire contained a suite of apartments on its upper floor that reminded a visitor to the palace of Wardour Street in central London.
- Glass was manufactured at Ile-Ife in the sixth century AD

Finally:

- According to New Scientist, there are surviving Timbuktu manuscripts that ‘cover botany, medicine, biology, chemistry, mathematics and climatology’

In writing this ebook, the author builds on the research of Professor Cheikh Ana Diop, Professor Ivan Van Sertima, Professor Charles Finch, Mr Hunter Adams, Mr Benaebi Benatari, Professor Rodney Medupe, Dr Nnamdi Elleh and Professor Claudia Zaslavsky.

This lecture essay is one of four essays that introduce African and African Diasporan contributions to science and technology. The other three in the series concern Ancient Egypt, early East Africa and African Diasporan contributions to science and technology.

From reader reviews:

Helen Perez:

This West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11) tend to be reliable for you who want to become a successful person, why. The key reason why of this West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11) can be one of several great books you must have will be giving you more than just simple examining food but feed anyone with information that maybe will shock your previous knowledge. This book is actually handy, you can bring it all over the place and whenever your conditions in the e-book and printed kinds. Beside that this West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11) giving you an enormous of experience like rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day task. So , let's have it and revel in reading.

Richard Hunt:

Your reading 6th sense will not betray you actually, why because this West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11) publication written by well-known writer whose to say well how to make book that could be understand by anyone who all read the book. Written with good manner for you, leaking every ideas and creating skill only for eliminate your hunger then you still doubt West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11) as good book not simply by the cover but also from the content. This is one reserve that can break don't evaluate book by its cover, so do you still needing yet another sixth sense to pick this!?! Oh come on your looking at sixth sense already said so why you have to listening to an additional sixth sense.

Gail Cote:

Beside this kind of West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11) in your phone, it could possibly give you a way to get nearer to the new knowledge or info. The information and the knowledge you are going to got here is fresh from your oven so don't be worry if you feel like an older people live in narrow community. It is good thing to have West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11) because this book offers to you personally readable information. Do you at times have book but you would not get what it's about. Oh come on, that will not end up to happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss that? Find this book and read it from right now!

Robert Lewis:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you could have it in e-book approach, more simple and reachable. This kind of West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11) can give you a lot of pals because by

you checking out this one book you have issue that they don't and make you more like an interesting person. This specific book can be one of one step for you to get success. This e-book offer you information that maybe your friend doesn't recognize, by knowing more than some other make you to be great individuals. So , why hesitate? Let me have West African Contributions to Science and Technology (Reklaw Education Lecture Series Book 11).
